

Measurements Around the Home

Measure the following items in your home, remembering to use the appropriate measuring equipment and metric units i.e. you wouldn't measure the weight of a bean in kilograms, or the length of a pencil in metres.

Lengths

The height of your front door.	
The size of your sitting room, length and width.	
The longest side of a stamp.	
The width of a piece of A4 paper.	
The height of your kitchen worktops.	
The width of your washing machine.	
The length of your back garden.	

Weights

Your weight.	
The weight of an average sized potato.	
The weight of a drinks can.	
The weight of a T shirt.	
The weight of a tin of beans.	
The weight of a bottle of milk.	
The weight of a pair of shoes.	

Capacities

The volume of a coffee mug.	
The volume of a small saucepan.	
The volume of a wine glass.	
The volume of a can of drink.	
The volume of 10 egg cups.	
The volume of one egg cup. (Use the answer above to help.)
